Document Ref.	Revision / Issue Date	Title / Contents
ENV-VGATE-GA-002	B 03/06/26	ENVIROFENCE VEHICLE GATE 1X1X1X1M GENERAL ASSEMBLY
ENV-VGATE-GA-003	B 04/06/26	ENVIROFENCE VEHICLE GATE CONNECTION DETAIL

Notes:

1. The 'angles in fence line' define the angles covered by the scope. These are measured between the attack faces of two adjacent fence panels.
2. The fencing system is available in configurations to suit mounting to concrete blocks placed on the ground or fence posts embedded within concrete foundations placed in the ground.
3. It is important to ensure that the local ground onto/into which the fence is installed offers compatible strength and that the fencing system is installed in accordance with the documents listed in the appropriate table titled Approved Assembly and Installation Drawings, only using appropriate components supplied by Panthera Group.
4. If gates are incorporated into the fencing system, the maximum height of the fencing system is limited to the height of the shortest gate used.

This certificate is maintained and held in force through regular surveillance activities.
