

Certificate of Product Approval

Certificate Number: 1059h

Issue: 01

Frontier Pitts Limited

Crompton House
Crompton Way
Manor Royal Industrial Estate
Crawley
West Sussex
RH10 9QZ

is authorised to use the LPCB mark in association with the product(s) listed in this certificate and appendix having complied with the requirements of the standard(s) detailed below:

Product

Terra G8 1
security gates

Standard

LPS 1175: Issue 8

Requirements and testing procedures for the LPCB certification and listing of intruder resistant building components, strongpoints, security enclosures and free-standing barriers

This certificate and appendix is maintained and held in force through regular surveillance activities

Signed for BRE Global Ltd.

Appendix to Certificate No: 1059h Frontier Pitts Limited

Issue: 01

Security Gate

Product Name	Type	Nominal Height (m)	Clear Opening Width (m)	Security Rating	LPCB Ref. No.
Terra G8 1	Automatic single cantilever sliding gate	2.4 to 3.0	3.0 to 10.0	A1 (SR1)	1059h/01

Compatible Drive Mechanism, Locking and Operating Devices

Drive Mechanism and Locking Device	Compatible Operating Devices	
	External	Internal
Secured on integral RMI 85 gearbox	None	Access control
		Free exit loop
		Key switch
		Push button
		Twist switch
	Access control	Access control
		Free exit loop
		Key switch
		Push button
		Twist switch

Notes:

- The gates shall be installed, operated and maintained in accordance with the documents titled 'Installation guide for Terra G8 sliding gate - 6062-20 Rev 1' and 'Terra G8 sliding gate operating and maintenance manual – DOC024 Rev 2'.
- The gates shall be installed onto flat level topography and mounted into concrete foundations formed in ground offering equivalent attack resistance.
- The resistance of the access control systems and operating devices used to operate the gates, to "non-mechanical" attack is not covered as it is outside the scope of LPS 1175: Issue 8. Likewise, the approval does not cover possible effects of any susceptibilities relating to the functionality and performance of any access control equipment that may be used to operate the gate. This is because the scope of access control devices and system configurations that may be used with these locking systems is "infinite". It is therefore recommended that specifiers and installers satisfy themselves that the components used are either resistant to mechanical
